Whether you're an industry professional, a landowner, or a concerned citizen, this guide will provide you with the insights and data you need to make informed decisions.

Mississippi Oil and Gas Industry Overview

Mississippi is a major player in the oil and gas industry, with a long history of production. In recent years, the state has seen a boom in oil and gas exploration and production, driven by the development of new technologies such as horizontal drilling and hydraulic fracturing.

As of December 26, 2024, there are over 10,000 active oil and gas wells in Mississippi. These wells produce approximately 1 million barrels of oil and 2 billion cubic feet of natural gas per day.

Types of Oil and Gas Well Permits

There are two main types of oil and gas well permits in Mississippi:

- **Drilling Permits:** These permits are required for the drilling of new wells.
- **Workover Permits:** These permits are required for the repair or alteration of existing wells.

Permitting Process

The permitting process for oil and gas wells in Mississippi is administered by the Mississippi Oil and Gas Board. The Board reviews permit applications to ensure that they meet all applicable safety and environmental regulations.

The permitting process typically takes several months to complete. Once a permit is approved, the operator must begin drilling or workover operations within one year.

Well Locations

Oil and gas wells in Mississippi are located in a variety of geological formations, including the Tuscaloosa Marine Shale, the Wilcox Group, and the Vicksburg Formation.

The majority of oil and gas wells in Mississippi are located in the southern part of the state. However, there are also a significant number of wells in the central and northern parts of the state.

Production Data

The Mississippi Oil and Gas Board collects production data from all active oil and gas wells in the state. This data is used to track production trends and to estimate the state's oil and gas reserves.

As of December 26, 2024, the cumulative production of oil and gas in Mississippi is over 1 billion barrels of oil and 10 trillion cubic feet of natural gas.

Environmental Regulations

The Mississippi Oil and Gas Board has a number of environmental regulations in place to protect the state's air, water, and land resources from the impacts of oil and gas development.

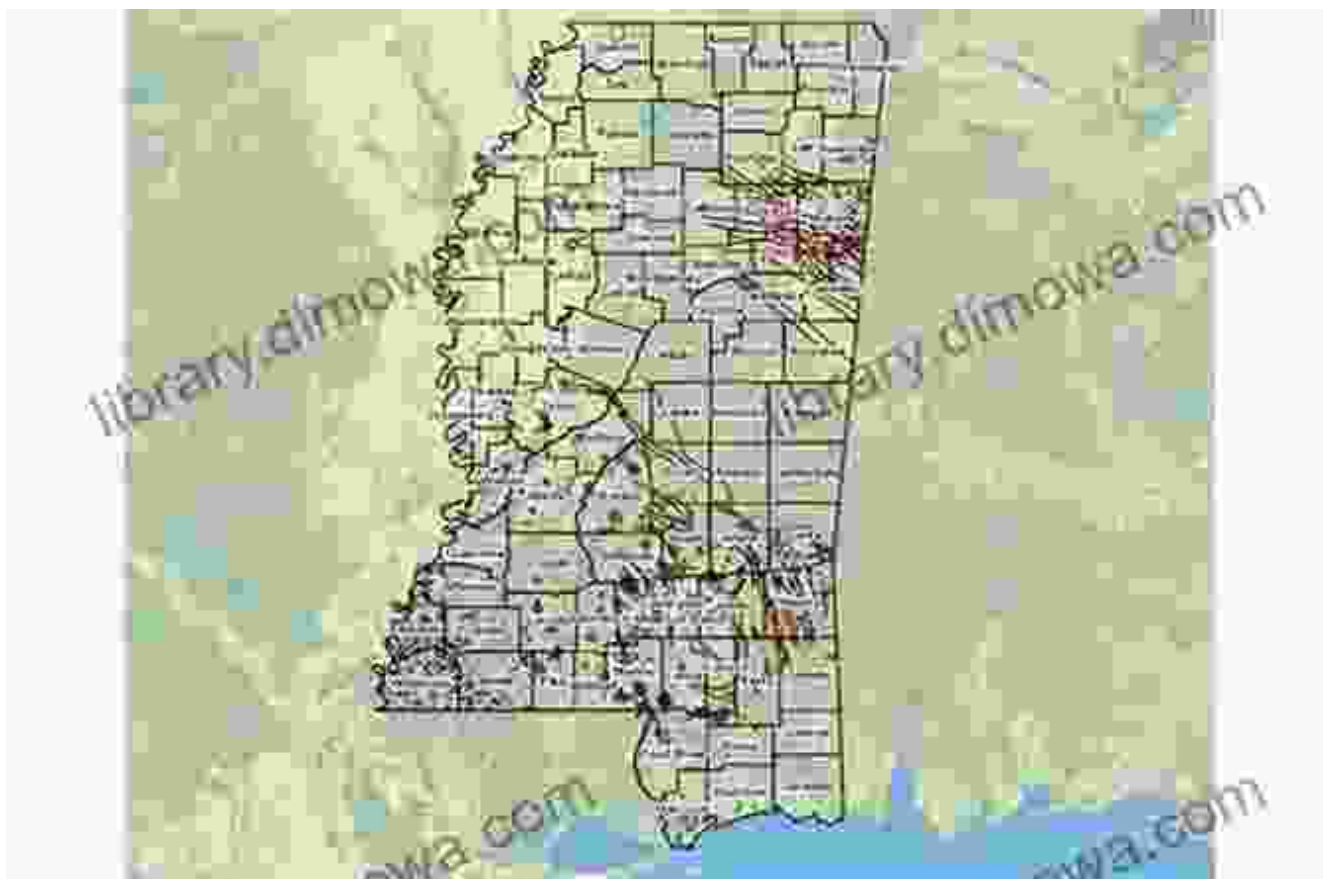

These regulations include requirements for:

- **Erosion and sediment control**
- **Water protection**
- **Air pollution control**
- **Waste management**

This guide has provided a comprehensive overview of Mississippi Oil and Gas Well Permits as of December 26, 2024. We encourage you to use this

information to make informed decisions about your involvement in the Mississippi oil and gas industry.

If you have any questions or need additional information, please contact the Mississippi Oil and Gas Board at (601) 359-1184.
